Security Tips

www.valdosta.edu/security

Enable 2FA and use the MS Authenticator App

Passwords

Use the VSU Password Reset Tool to change your password if forgot. valdosta.edu

- Use a phrase or series of words with numbers and symbols for a secure password- minimum 12-14 characters.
- Don't use your VSU password for non-VSU accounts.
- Don't share your password with anyone or let others use your computer while logged in under your account.

VSU IT will never ask for your password.

- Use a password manager instead of writing down passwords. Although VSU offers a password manager solution, these are some of the most popular options:
LastPass, Keeper, Dashlane, or 1Password

Phishing

A method used to trick you into providing sensitive information or downloading malicious software.

- Be cautious about opening email attachments, regardless of who sent them. Call the sender to verify.
- Forward suspicious email to abuse@valdosta.edu
- Hover your mouse over links to see if they are sending you to a legitimate web site. Do the same with email send names. Open a new browser tab and manually type the web address in the Address Bar.
- Look for misspellings and bad grammar.
- Look for 'https' () and a lock icon in the address bar before entering private information.

Encryption

VSU emails that contain personally identifiable information are encrypted.

IT Emails

abuse@valdosta.edu
